

Offered storage capacities for the thermal year 2016-2017

The Overall Space for storage service offered for the T.Y. 2016-2017 is equal to 8.017.000.000 kWh (equivalent to 758 MSm³ @ PCS 10.57275 kWh/Sm³). Edison Stocaggio following the deliberation AEEG 149/2012/R/GAS does not provide strategic storage service and make available approximately a volume of 140 MSm³ as strategic reserve.

The contractual services capacities are divided as follows:

Storage Service	MSm ³	kWh
SBil	3	32.000.000
SMin*	0	
Smod***	755	7.985.000.000
Strategic Service**	140	

Overall Injection capacity (CI) associated by Edison Stocaggio to offered Overall Space is 63.800.000 kWh/g (equivalent to approximately 6,03 MSm³/d @PCS 10,57275 kWh/Sm³), and it is divided among different services as follows:

Overall Injection Capacity CI	MSm ³ /d	kWh/d
CIBil	0,03	300.000
CIMin	0	
CI mod	6	63.500.000
CI during withdrawal period	0,5	5.500.000

Overall Withdrawal Capacity (CEmax) associated by Edison Stocaggio to offered Overall Space, is 80.150.000 kWh/g (equivalent approximately to 7,58MSm³/d@ PCS 10,57275 kWh/Sm³), and it is divided among different services as follows:

Overall Withdrawal Capacity CE	MSm ³ /d	kWh/d
CEBil	0,03	300.000
CEMin	0	
CEmod	7,55	79.850.000
