

# T.Y. 2019-2020

## Capacity in Advance

**Offer of “Capacity in Advance” as described in Storage Code 3.2.1.4 e 5.9.2.1.**

With reference to “Capacity in Advance”, Edison Stoccaggio makes available:

PARAMETERS	AUCTION DA 02.26.2020	AUCTION DA 02.27.2020
Day when capacity will be available	<b>02.27.2020</b>	<b>02.28.2020</b>
Max Performance available in Advance	<b>5,280,000 kWh/d</b>	<b>5,280,000 kWh/d</b>
Day of Reduction	<b>02.29.2020</b>	<b>03.01.2020</b>
Conversion Factor	<b>1</b>	<b>1</b>
Percentage of Reduction	<b>100%</b>	<b>100%</b>

Customers may participate to one or both auction without sequentially bonds, but they shall reduce the capacity in the day/s decided by Storage Company.

Quantity of “Capacity in Advance” which goes as offer in the dedicated Auction is formed by the offers of reduction. It means that, if none edit offers of reduction, the quantity in advance is null.

Both Quantity and Price edited for the reduction are normalized by Conversion.

**“Function of Cost” is ZERO.**

Price shown in the Auction is the sum between the normalized price of reduction and the function of cost.

**Purchasing offers have to be inserted in Escomas’ page in “Offerte Asta Day-Ahead”.**
